

Windows 7 Compatibility

Sage MAS 500

Sage Support

Sage supports Sage MAS 500 version 7.3 client with Product Update 1 (Dec. 2009) running on Windows 7.

Version 7.2 is currently being tested on Windows 7, and is expected to be supported by Sage shortly.

Logo Certification

Sage MAS 500 version 7.3 has been formally certified by Microsoft as being compatible with Windows 7, 32-bit and 64-bit versions.

For reference, see the [Sage MAS 500 ERP entry](#) on Microsoft Windows 7 Compatibility web site.

Sage MAS 90, 200, and Extended Enterprise Suite

Sage Support

Windows 7 compatibility testing is currently in process for Sage MAS 90 and 200 versions 4.3 and 4.4, and Extended Enterprise Suite versions 1.3 and 1.4. We expect compatibility information to be published by the end of March 2010. Versions older than 4.3 (1.3 for EES) will not be supported on Windows 7.

Logo Certification

There are no plans to obtain Windows 7 logo certification for Sage MAS 90, 200, or Extended Enterprise Suite.

Sage Accpac

Sage Support

Sage Accpac versions 5.6, 5.5, and 5.4 are supported on Microsoft Windows7. Windows 7 support will be limited for certain configurations in the Extended Enterprise Suite and some third-party software components that operate together with Sage Accpac due to the timing of product release and legacy issues – for full details please visit <http://www.sageaccpac.com/products/systemrequirements>.

Logo Certification

There are no plans to obtain Windows 7 logo certification for Sage Accpac.

Windows 7 Compatibility – Quick Reference Chart
