

StarShip Parcel

Use StarShip Parcel to get your inventory in the hands of your paying customers as quickly and economically as possible. This innovative module helps you achieve and maintain strong customer loyalty by making the entire shipping process more fluid. Plus, when combined with the pick, pack, and ship feature built into the Sales Order module, StarShip Parcel helps your company become a more competitive business and even has the potential to reduce shipping and shipping-related expenses.

StarShip Parcel automates the shipping process by:

- Calculating freight charges through the use of an optional integrated scale
- Rate shopping between carriers to find cost-reduction opportunities
- Supporting third-party parcel insurance to cut parcel insurance costs
- Printing carrier-approved, bar-coded shipping labels and COD tags at the warehouse workstation for convenience and speedy processing

Reduce shipping-related expenses and help your company become a more competitive distributor by using StarShip Parcel. Leveraging information from the Sales Order module, you'll accelerate your picking, packing, and shipping functions.

Shipment Total	15.84

◀ StarShip Parcel allows you to automate your shipping process by giving you access to all of the necessary customer, shipping, and pricing fields.

FEATURES

Using StarShip Parcel

1. When your warehouse workers finish filling in the Sage MAS 90 or 200 Shipping Data Entry screens within Sales Order, they click the StarShip button.
2. The StarShip Parcel entry screen automatically appears, populated with all the necessary customer, shipping, and pricing fields.
3. If a scale is integrated, the worker places the package on the scale and freight charges are automatically calculated based on the shipping method.
4. Optionally, the warehouse worker can select different carriers to shop for the best rate.
5. When data entry is complete, the shipping label prints from StarShip Parcel, it's affixed to the package, and your shipment is on its way. Shipment tracking numbers can be automatically stored within Sage MAS 90 and 200.
6. Pressing the Save button triggers StarShip Parcel to write all the appropriate customer, shipping, and pricing information back into Sage MAS 90 or 200 for follow up and rapid response to customer inquiries.

Multiple Carriers Supported

The standard StarShip Parcel processes shipments using UPS® and FedEx. Additionally, you can purchase functionality for processing shipments for the U.S. Postal Service, DHL (formerly Airborne Express), Spee-Dee Delivery Service, and a user-definable carrier.

Standard Carriers

UPS

- StarShip Parcel is UPS Online certified, so you can rest assured the software is fit to electronically upload shipment files and reference data to the UPS Data Center. This allows your customers to track their packages without calling your busy customer service staff.
- Easily print UPS Maxicode labels and COD tags on thermal label printers for high-quality, scanable labels.
- Print the return label so it can be included in the package or e-mail a return label to the customer.

FedEx Basic

- Ship and track your domestic Express, Ground, and Home Delivery packages in real-time using the Internet.
- Calculated freight charges are based on published or custom rates to provide billing flexibility.
- Print bar coded shipping labels on thermal or laser printers. Also supports printing of dangerous goods certificates.
- StarShip Parcel is a certified Fed Ex API Solution.

Optional Carriers

United States Postal Service (USPS) Including Delivery Confirmation

- Manifest your mail by printing permit labels, manifest reports, and postage statements.
- Delivery confirmation barcoded labels have been tested for accuracy and approved on a national level, ensuring that StarShip Parcel is delivery confirmation certified.
- Automatically upload shipment detail to the USPS so delivery confirmation of Priority and Standard Mail (B) shipments can be sent.

DHL (Formerly Airborne Express)

- Support for DHL Linkage gives you the flexibility of using your custom rates, printing bar coded shipping labels, and uploading via the Internet at the end of the day.

Spee-Dee Delivery Service

- Calculates zone and freight charges and prints shipping labels, COD tags, and manifests.
- Supports Shipment Weight and Metro service.

User-Defined Carrier

- Use the module to define up to 10 parcel carriers or keep track of shipments going out through your internal fleet.
- Supports one service (Ground) with up to 100 zones and rates for 1 to 200 lbs. per zone.
- Prints shipping labels, COD tags, and manifests.

Optional Interfaces

FedEx High Volume

- Shipment transactions are sent through the FedEx Ship Manager Server allowing for faster processing time.
- Supports domestic and International Express, Ground, and Home Delivery.

End-to-end solutions. Expert advice.
Ongoing support. That's Sage 360°.
