

## SharePoint 2013 Overview

*The new way to work together*

### Share

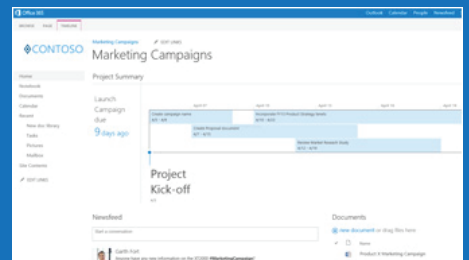

Connect with employees across the enterprise - use SharePoint 2013 to engage with people, share ideas and reinvent the way you work together

- **Share documents** - A single place to store all your documents and collaborate with colleagues in real time
- **Social feeds** - Use feeds to stay on top of relevant content and collaborate with coworkers
- **Groups and communities** - Engage in discussions with experts and find answers
- **Mobile** - Anywhere access to people and your information

### Organize

Whether working as a team or an individual, SharePoint 2013 helps you organize information, people and projects

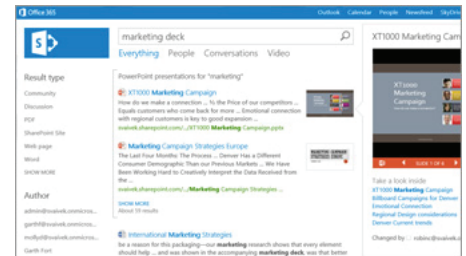

- **SkyDrive Pro** - Keep your documents in sync and access them wherever you go
- **Sites** - Create a single location for your team to organize content, share ideas and manage a project
- **Task management** - Manage personal and team tasks right within SharePoint 2013 and integrate with familiar tools like Outlook and Project
- **Site mailbox** - Manage your project email and documents in one place

# Discover

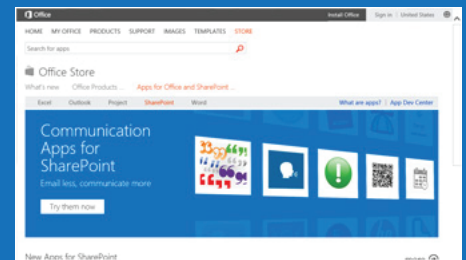

SharePoint 2013 makes it easy to find answers, discover insights and connect with experts

- **Find stuff** - SharePoint 2013 search is like Bing for any information within your company
- **Your results** - Personalized results based on your intent and past behavior
- **Find people** - Connect with the experts in your enterprise
- **Discover insights** - Explore and combine data from multiple sources using PowerPivot
- **Visualize data** - Share dashboards and interactive reports using Power View

# Build

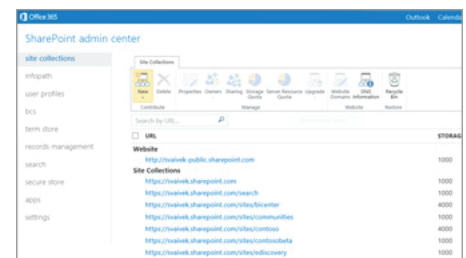

Developers and web designers can create new experiences on SharePoint 2013 using familiar tools and internet standards

- **Install Apps** - Customize and extend your SharePoint 2013 sites
- **Sites** - Create a single location for your team to organize content, share ideas and manage a project
- **Build websites** - Design and publish rich websites using familiar tools and internet standards
- **Adaptive site experiences** - Create a unique experience for every visitor to your website

# Manage

SharePoint 2013 provides powerful controls that allow IT departments to manage cost, risk and their time

- **Simplified Upgrade** - Multi-step upgrade process allows you to upgrade servers without impacting users
- **Optimized performance** - SharePoint 2013 servers are designed to use minimal resources yet deliver a snappy user experience
- **Manage risk** - A single place to perform eDiscovery across sites, email and IM
