# Sage X3 E-commerce
Create and manage your online presence while seamlessly integrating with Sage X3 in real-time

Sage X3 E-commerce enables Wholesale/Distribution companies to leverage their investment in Sage X3 by significantly lowering the costs of managing customer specific online catalogs and automating the process of accepting online orders and payments.

Sage X3 E-commerce was built for Sage X3 and has the ability to mimic core Sage X3 functions, including the pricing engine, with changes made in Sage X3 synchronized in real time. It includes full featured B2B and B2C shopping carts, a Customer Portal and Sales Rep portal in a single system.

Key benefits for your business:

- Gain control over the consistency and accuracy of your online Catalog

- Significantly lower your costs of maintaining your online presence

- Dramatically simply the process of accepting online orders and payments

- Reach new customers and markets in a very cost effective manner

- Empower your Sales Team with real-time customer information
