Our Purpose

We are NOT your traditional eCommerce agency.

We are THE **erpCommerce** agency
LASER FOCUSED on ONE SOLUTION

Unleashing the potential of our clients' B2B and B2C eCommerce, powered by the ERP systems that run their businesses.

Supported by experts in eCommerce and across multiple dedicated ERP practices within our sister company – Net at Work - we are the ONE trusted partner clients call first, to deliver unified **erpCommerce**.

Our ONE goal is to enable our clients' strategic eCommerce objectives by facilitating growth, maximizing profitability and improving operational efficiency and customer experiences.

Magento & Pixafy

Magento is a Gartner Magic Quadrant Market Leader Three Years Running.

The Pixafy **erpCommerce** solution, enables you to go live with a transactional, commerce-ready site INTEGRATED to your ERP….in 90 days or less.

Global and complete eCommerce solution - B2B and B2C – with deep application and partner ecosystem to allow for limitless extensibility, flexibility, and scalability.

Magento & Pixafy

Focus on B2B – while Magento offers rich B2B functionality, the Pixafy **erpCommerce** solution allows our client's ERP systems to be the single point of truth which runs the online businesses and workflows.

The Pixafy/Net at Work solution is created with ERP integration as the core value add – not like other integrations that are built by web developers, our access and subject matter expertise on Sage X3 (and ERP as a whole) makes this the **erpCommerce** solution

MADE FOR ERP USERS BY ERP SPECIALISTS

Benefits of the erpCommerce Dashboard & Integration Engine

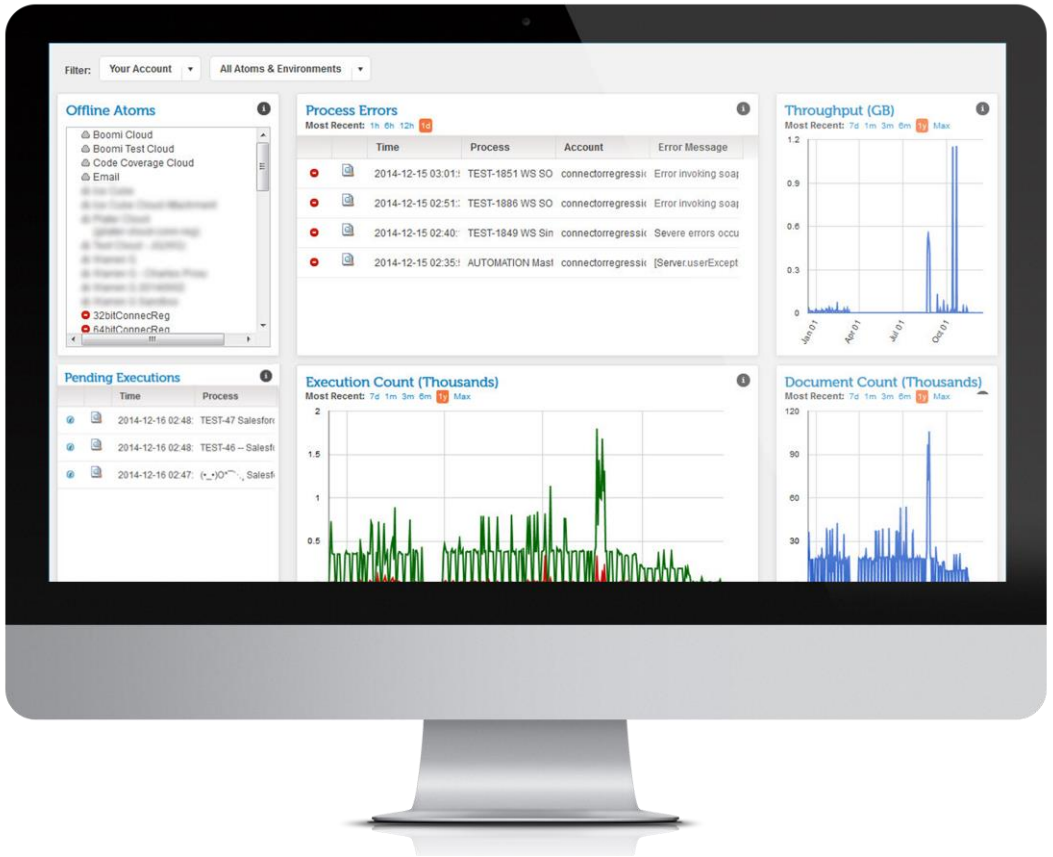
Merchants are not locked in to proprietary "point" integration solution; ability to develop and enhance on top of existing code base.

Use of Gartner Magic Quadrant, industry leading iPaas solution (Dell Boomi) allows us to extend integrations to other software/tools, aside from ERP (CRM, OMS, etc.) using the same tool, with pre-built connectors (which may need to be modified) for dozens of other solutions.

Community of resources that know platform AND training resources so that clients themselves can build out/enhance integrations on their end.

Benefits of the erpCommerce Dashboard & Integration Engine

- ✓ **Simplified Communication** – no need for custom coding between 2 systems (built on different code bases), write connection point once, and integrate with multiple end points
- ✓ **Centralized System** to monitor integration (as well as alerts, backups, etc.)
- ✓ **Both systems can operate independently** – if either system has an outage (planned or unplanned) the other system continues to operate, and data syncs can be queued up till service restored
- ✓ **Flexibility** to develop custom workflows



Integration Touchpoints Include:

Magento

- New Products/Product Updates
- Product Inventory
- Product Pricing
- Customer Shipping/Billing Profiles
