

QUICK START PACKAGE

SAGE ENTERPRISE INTELLIGENCE IN THE CLOUD

FIXED PRICE, FIXED SCOPE OFFERING WITH RAPID DEPLOYMENT TO GET YOU UP AND RUNNING QUICKLY.

Reduce time spent on analysis and reporting, and make faster, better-informed decisions. The tight and secure integration of Sage Enterprise Intelligence (SEI) with Sage X3 ensures the reliability of critical business information, provides business users with coherent insight on real-time enterprise data, supports clear decision-making and fosters continuous cross functional improvement.

KEY FEATURES:

- ✓ Installation and Configuration of SEI in your own private cloud
- ✓ Installation of new templates available with the Universal Data Model (UDM)
- ✓ Migration of any pre-existing cubes and SEI reports
- ✓ Connection to 1 live production Sage X3 folder and 1 pilot/test folder
- ✓ Installation and Configuration of the SEI Excel plug-in on 1 workstation
- ✓ 2 seats for remote training sessions with Net at Work
- ✓ Up to 8 hours of remote consulting for development of company-specific reports
- ✓ One SEI upgrade per year and installation of all critical patches

QUICK START PROCESS:

Net at Work stands up your SEI instance in the cloud and, if required, migrates any pre-existing custom reports/cubes and gives you access to your new version of SEI in the cloud

Net at Work logs on to 1 user's workstation to install the SEI Excel plug-in

You attend an SEI one-day training session at Net at Work or remotely (2 seats)

Net at Work provides remote assistance in creation of SEI reports

PRICING INFORMATION:

STARTING AT **\$515/MONTH** OR **\$1,015/MONTH** WITH HOSTING | ADDITIONAL SOFTWARE OPTIONS AVAILABLE

PRE-REQUISITES AND ASSUMPTIONS

GENERAL

- Client will complete pre-engagement questionnaire provided by Net at Work project manager prior to scheduling this engagement.
- Client will provide Net at Work consultants with adequate access to network to perform duties as well as adequate co-located workspace and meeting rooms, as needed.
- Client will assign personnel for this project that has appropriate financial and operational knowledge of the Sage X3 configuration.
- All remote consulting must be used within two months of program start.
- This program assumes Sage Enterprise Intelligence has been purchased and associated licenses are available.

TECHNICAL REQUIREMENTS

- Sage X3 version 7 or higher.
- Supported OS, browsers, SQL, Microsoft Office applications, IIS, and related settings must be deployed by the client. A compatibility list will be provided.

USER TRAINING

- Two seats for pre-scheduled remote sessions with Net at Work SEI experts.
- Agenda for this training will include the following topics:
 - › Overview and navigation
 - › Modifying Existing Reports
 - › Creating New Reports
 - › Integrating SEI within Sage X3
 - › Using the Excel plug-in to develop financial reports

REMOTE SEI CONSULTING

- This package includes up to 8 hours of remote consulting on report design and development. The number of reports that can be created during this time is contingent on the complexity of reports. We estimate that we will work on 1 or 2 reports within this time.

OPTIONAL SERVICE – TECHNICAL TRAINING AND CONSULTING

Provides training on using the SEI platform to connect to non-X3 databases, add mobility and distribution options, and create your own custom SQL views to use in SEI.

This option includes the following:

- ✓ Pre-requisite consulting
- ✓ Remote Technical and Administrative Training Session for up to two resources
- ✓ 8 hours of consulting and assistance with achieving client-specific technical objectives

The client must have technical resources that would receive the benefits of this optional service. These resources must have knowledge of how to build SQL queries and understand the general architecture of tables and fields used in Sage X3.

OPTIONAL SERVICES COST: \$2,400 (SOFTWARE AND T&E NOT INCLUDED)
