ACCOUNTS RECEIVABLE AUTOMATION SOLUTION

The complete accounts receivable management platform that gives your team more time, more insight, and more control.

Supercharge your cash flow.

Growing and successful companies depend on high-performing teams, impeccable communication, and efficient processes to achieve their goals. But a large customer base and high revenue bring numerous challenges, such as accurately forecasting cash flow, keeping customers happy, and getting cash in the door. YayPay simplifies the collections process and improves the invoicing experience with our Accounts Receivable (AR) software that centralizes customer information and gives visibility into the AR pipeline. With comprehensive reporting, automated end-to-end collections management, and self-servicing payment portals, you'll have the assurance of when and what you'll be paid, so your business can grow and operate with ease.

6 ways YayPay helps AR teams.

YayPay was built by people for people - we understand how financial teams function, and have designed our user-friendly platform to make collections fast, easy, and predictable.

1 **Increased team efficiency by 3x**
Customized workflows and automated manual tasks help your team function strategically, so you can do more with less.

2 **Strengthened customer relationships**
Remove unnecessary friction and make payments simple for your customers with a modern and secure statement portal.

3 **Better cash flow forecasting with 94% accuracy**
Superior AR analytics use a payor's credit risk assessment and historical payment behavior to predict upcoming payments and identify where to focus attention.

4 **Frictionless internal collaboration**
Get all internal teams working towards a common goal by increasing visibility and communication with an intelligent CRM.

5 **Standardized collections process**
One shared process means everyone is following the same set of rules, making goal setting and tracking a breeze.

6 **Improved AR metrics**
An increase of up to 34% in payment speed equals a major decrease in Days Sales Outstanding (DSO) for most YayPay customers.

Industries we serve.

By understanding the nuances of your industry, YayPay can support your business in the ways that matter most.

Software
Become more efficient and improve margins without adding headcount.

Wholesale/Distribution
Manage large cash flow needs and get paid as quickly as possible.

Manufacturing
Reduce risks associated with a recurring payment model.

Advertising/Media
Stay competitive and operate more effectively by reducing DSO.

Professional services
Promise a positive customer experience and increase cash flow.

Trusted by 1000+ users

Seamless integration.

YayPay seamlessly integrates with multiple accounting, ERP, billing, and CRM platforms. If a pre-built integration isn't available for your invoicing platform, we have an API available.

YayPay is on a mission to improve the order-to-cash experience for finance teams and their customers with a smart and modern AR solution. Co-founded by Anthony Venus, CEO, and Eugene Vyborov, CTO, we are a rapidly-growing, venture-backed team committed to developing the most effective, intelligent, and user-friendly AR software for our users. Our software has received numerous awards and acknowledgements from industry influencers including CFO Tech Outlook, TechCrunch, and PaymentsSource.
