

# PRICE UTILITY FOR SAGE X3

## Easily Automate Updates to Costing and Pricing

The Price Utility for Sage X3 automates the process of updating price(s) and/or cost(s). The Price Utility allows you and your team to quickly and easily make profit-preserving decisions and make mass updates to the pricing and costing table in Sage X3.

### Key Features

- ✓ **Access current and past pricing** by a variety of criteria including stat groups, like descriptions, BPs, site, etc.
- ✓ **Increase or decrease pricing** by amount or percentage
- ✓ **Save your work in progress** for review/approval before you publish new pricing (all changes are retained for audits)
- ✓ **Supports multiple units of measures** – either specify a new price for one unit and the utility will apply to all other units OR manage each unit individually
- ✓ **Supports conversion of liquids to dry** (and vice versa) using density/specific gravity stored in X3
- ✓ **Set effective date for pricing** to manage changes in advance
- ✓ **View and compare** margin for new and old values in a grid display
- ✓ **Produce price increase letters** and send directly to customer contacts
- ✓ **Works for both sale and purchase price lists**
- ✓ **Supports any currency** configured for price lists
- ✓ **Old pricing is never deleted** – records are expired when the new pricing is published
