## Solutions for Nonprofits

### WHO WE ARE

Net at Work helps nonprofit organizations more effectively manage their operations through the use of technology. Our team of CPAs, consultants, and developers bring deep experience in helping nonprofit finance teams add strategic value to their organizations by enhancing productivity, improving the timeliness and accuracy of reporting and proactively addressing changes in technology and regulatory environments.

With an emphasis on Next Generation, cloud-native financial management, CRM and HRMS solutions, Net at Work is committed to delivering a truly connected back office technology ecosystem for nonprofits that will change and grow with you as your organization evolves.

### HOW NONPROFITS BENEFIT FROM WORKING WITH NET AT WORK

#### **Optimize Federal Grant Management**

Our team has many years of deep audit experience that allows them to advise you on navigating the maze of federal and state grant requirements.

#### **Optimized Financial & Management Reporting**

We bring the right tools and experience to help ensure that your nonprofit not only meets its compliance reporting requirements, but also delivers timely and meaningful management reports to your stakeholders.

#### **Effective Technology Implementation & Support**

Net at Work has helped hundreds of nonprofit organizations go through meaningful technology transformation. Not only do we have an effective process for assisting organizations through the initial migration, but we provide a lifetime of support as organizations continue to evolve over time.

### HOW WE HELP

#### **Next Generation Financial Management**

Cloud-native accounting and financial management tools are transforming the way nonprofit finance organizations solve problems and add strategic value to their organizations. We help you identify, deploy and integrate best-in-class financial management tools that will help your organization improve timeliness and accuracy of financial and management reporting and maximize workflow and internal controls.

#### **HR, Payroll & Time**

Net at Work helps nonprofits identify and deploy comprehensive and integrated Human Resource Management solutions that are optimized for the unique accounting and tracking requirements faced by nonprofits.

#### **Cloud-connected Back-Office**

Every nonprofit has an ecosystem of technology applications that individually provide the platform for delivering finance, development, human resource management, client tracking, billing and other functions essential in the effective delivery of programs and services. Net at Work's Cloud-Connected Back-Office for Nonprofits provides a platform that ensures that data flows are automated, systems are in sync and timely, accurate information is available to support strategic decisions.
