INDUSTRIAL MANUFACTURING SOLUTIONS

Accelerate Growth With a New Approach

Mitigating Risk Through the Transformative Effects of Technology

Today's industrial manufacturers continue to contend with workforce challenges, sourcing bottlenecks, cyberattack concerns and inflationary pressures, while overall economic uncertainty lingers.

Investments in technology and automation, as a part of a new approach to mitigate risk and reinvent operations, present an opportunity to address current demands while shaping your factory of the future. These investments hinge on partnership with a full-service technology advisor, as your guide to digitally transform your operations to broaden capabilities and accelerate growth profitably, productively and efficiently.

Strategic Collaboration Toward Success

Our technology consultants have a strong knowledge of market trends, manufacturing processes and best practices, logistics and compliance requirements, and the latest solutions to ensure that your strategic goals are achieved within your budget and timeline. Some of the benefits realized by Net at Work manufacturing customers include:

- ✅ Complete visibility into key measures and metrics through a single source of truth for enhanced decision making

- ✅ Improved customer and employee satisfaction rates

- ✅ Achieved reliable, 24/7 access to data

- ✅ Automated processes across the entire business

- ✅ Saved time and improved margins through better forecasting, ordering and allocation functionality

Why Net at Work?

Your Manufacturing Technology Partner

Net at Work is one of the top Value-Added Resellers in the United States today, advising small-to-medium-sized industrial equipment manufacturing companies and providing extensive support, from software selection and implementation through Business Process Optimization and Fractional CIO & Advisory services.

We look at your operations holistically to understand your strategic plans and create a technology roadmap that can help you achieve your goals and objectives at the necessary pace, within budget. And because our technology experts are versed in both legacy software and hardware environments as well as Next Generation, cloud-based solutions, we are uniquely positioned to help digitally transform your business.

Accelerate Growth with Your Digital Operations Platform

Next Generation ERP solutions are an integral part of Digital Operations Platforms (DOP), the successor to previous generations of accounting and business management software. These modern ERP solutions are built on cloud technology, making them easy to work with and simple to maintain. They allow your company to scale operations efficiently, without adding more administrative personnel, and harness vast amounts of vital business data to help facilitate faster, better decision making. As the core of your DOP, Next Generation ERP supports and advances your relationships with customers, suppliers, distributors, employees, vendors and other stakeholders.

CHALLENGES

- ❌ Lack of consulting support
- ❌ No CRM integration
- ❌ Field service struggles
- ❌ Existing legacy system dependent on continued support from publisher

SOLUTIONS

Created a custom Digital Operations Platform (DOP), including:

- ✅ A new, modern software system with a proven combination of core manufacturing and configuration to structure the system well for the business
- ✅ Private cloud hosting to support its configure-to-order and assembly operations
- ✅ Reliable internet connectivity and support through Cloud at Work

IMPACT

- ✅ Shaved over 25 minutes from its order entry process
- ✅ Rapidly pivot from Just-in-Time inventory management to overcome supply chain challenges
- ✅ Achieved new-found visibility into its component parts
- ✅ Instituted more reliable, 24/7 access to its business management solutions
