

# HEALTHCARE SOLUTIONS

Your healthcare practice is working harder than ever. Our technology experts can help.

# Meeting the Evolving Challenges in Healthcare

The [U.S. national healthcare expenditure reached \\$4.3 trillion in 2021](#) and is estimated to reach \$6.2 trillion by 2028, according to the Centers for Medicare and Medicaid Services. At the same time, the market is rife with continued economic uncertainty, breakneck speed of technological development, supply chain issues and a changing landscape.

In order to compete successfully, healthcare organizations are adapting by doing more with less, preparing for [the effects of industry consolidation and the rise of retail clinics](#), and closely monitoring their financials.

***The need for a technology advisor to support your practice is greater than ever. Our experienced healthcare technology experts can help your team navigate these challenges by creating custom solutions that will help you:***

- ✓ **Unlock revenue** by bringing new products and services to market
- ✓ **Budget and plan** during a time of turbulence in healthcare
- ✓ **Make disparate data actionable** through visibility, flexibility and efficiency
- ✓ **Adapt to new payment models** including value-based care
- ✓ **Automate and create efficiency** by shortening the monthly close, reducing personnel needs and minimizing manual processes
- ✓ **Meet the latest reporting mandates** such as Patient-Driven Groupings Model (PDGM), HIPAA and Medicare & Medicaid requirements

*“Net at Work is fabulous, and they completed the conversation remotely, on time and on budget.”*

# Supporting Your Practice with a Digital Operations Platform

Next Generation ERP solutions are an integral part of Digital Operations Platforms (DOP), the successor to previous generations of accounting and business management software, that extend ERP functionality beyond your healthcare practice to encompass billing, compliance, patient scheduling and more.

[Next Generation ERP solutions](#) are built on modern cloud technology that are easy to work with and simple to maintain. They allow your healthcare organization to scale operations efficiently, without adding more administrative personnel, and harness vast amounts of vital business data to help facilitate faster, better decision making throughout your practice. As the core of your DOP, Next Generation ERP supports and advances your relationships with patients, caregivers, clinicians, payers and other stakeholders.

## BUILDING YOUR UNIQUE DIGITAL OPERATIONS PLATFORM (DOP)

# Long Term Care Restores Financial Success

## Significant Savings of Money and Hours

Personal Healthcare, a senior care management company specializing in providing long-term care to seniors, previously used outside accountants and an industry-specific software suite to manage its financials, but the software failed to keep up with the company's rapid growth trajectory. Learn how its technology prepared the company for financial success:

[Download the Full Case Study Here](#)

### CHALLENGES

- ✗ Lengthy monthly close
- ✗ Use of outside accountants
- ✗ Need to hire accounting staff due to growth
- ✗ Difficulty forecasting

### SOLUTIONS

- ✓ Consolidate financials across its multiple entities instantaneously
- ✓ Reports that can be uploaded directly to cloud-based financial hub for processing – saving the bookkeeper at least 20 hours of accounts payables data entry every month
- ✓ Reduced manual data entry

### IMPACT

- ✓ Shortened monthly close from one week to one day
- ✓ Saved over 400 person-hours annually
- ✓ Avoided \$80,000 in additional annual salary costs
- ✓ Sustained 30% growth while maintaining lean finance team

***“We’ve been able to bring more accounting in-house, and avoided hiring another 1.5 employees that we would’ve needed to keep up with our growth – at a savings of around \$80,000 each year. Our staff can take on more new projects and financial analysis that they simply didn’t have the bandwidth for before.”***

*- Israel Ostrovitsky, Controller, Personal Healthcare*
