

Sage X3

Preventive Maintenance

Drive efficiencies in your manufacturing operations with maintenance capabilities for managing your equipment

The goal

Customers in both process and discrete manufacturing need a way to manage and maintain their equipment, ensure the appropriate maintenance activities are taking place, schedule production around machines that are down, and capture materials and labor that are required to maintain these machines. Preventive maintenance provides that solution.

Preventive maintenance is an add-on solution to Sage X3, built using the development tools and platform that extends several core Sage X3 functions for easier adaptability.

The Sage X3 Preventive Maintenance includes:

- Job Ticket Management - job ticket (repair, replace, and scheduled), cause and remedy codes, resources assigned, and materials used
- Resource management that allows a calendar for scheduling resources
- Equipment management using product & BOM functionalities
- Scheduling maintenance job tickets
- Using work center functionality to track labor, costing, and routing steps
- Extensive reporting capabilities
- Simplicity of design allows for easy adoption

Key benefits for your business:

Sage X3 Preventive Maintenance provides greater visibility into its operations and planned maintenance.

Tracking these physical assets can help to:

- Reduce inefficiencies, costly downtime, and thereby increase profits
- Improve productivity
- Optimize inventory levels and purchasing costs
- Offer more flexibility with your operations
