BUSINESS PERFORMANCE UNLEASHED

By delivering greater efficiency, a favorable ROI and a more personalized experience than traditional ERP systems, Sage X3 helps businesses focus on what really matters. Sage X3 offers flexible deployment options and services, giving you the freedom to consume and scale the solution as your business changes.

Financial management

A complete business management solution. Automate your financial processes from journal entry to invoicing, accounts payable, accounts receivable and procurement. Reduce the complexity of managing multiple sites, business units and product lines with multi-dimensional functionality. With Sage X3 you can take the administrative burden out of managing your budgets with collaborative workflows that let you effectively work with colleagues. Stay compliant no matter where you do business with multi-legislation, multi-language, and multi-currency capabilities. Manage fixed assets in accordance with developing regulations.

Reporting and analytics

Generate insight from business data across multiple machines and sources. With Sage X3 you can be confident that all key stakeholders have personalized information with access to live dashboards customized for specific business roles to monitor performance and alerts on any abnormalities in the business. Create customizable scoreboards for individual business roles and navigate up and down the audit trail to manage risks. Distribute consistent reports across the organization, trigger alerts and workflows based on KPIs, and enable collaboration to make better decisions.

Supply chain management

Enable faster production cycles and faster response times, while efficiently managing the supply chain. Using Sage X3 you can maintain optimal stock levels and deliver on customer commitments by easily identifying dependencies between work orders and material availability. Manage logistics, control warehouses, and track key information. Run best-in-class operations with continuous improvement programs.

"We basically restructured all our business processes to take advantage of Sage X3's flexibility, customizability and the ability to run on-premise, or as a cloud-based solution."
Kory Keenan, IT Manager, Kobayashi

Production management

Automate your production processes and respond faster to customer demands. Improve predictability across the manufacturing process. Maintain agile production cycles with advanced bill-of-material management, production planning, and shop floor control. Reduce costs, improve customer experiences and drive quality and performance improvements with non-compliance and non-conformance management.
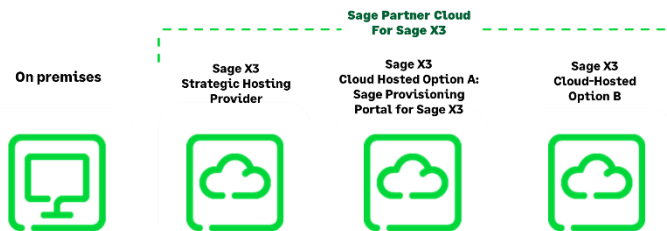

Project management

Know the ROI of your various initiatives and projects. Respond faster to customer inquiries and optimize profitability with accurate project costing and pricing. Improve cost management and gain better control of project profitability. Using Sage X3 you can define project schedules, forecast costs, manage timesheets and track financials. Ensure accurate tracking of all tasks and dependencies to optimize profitability and keep projects on schedule. Consolidate multiple projects and create snapshots and financial comparisons. Report on KPIs such as sales margins, budgets and commitments.

Sage

"We've reduced our inventory carrying costs by 30% -that represents nearly $500,000 in cash freed up. Inventory turns are up by 20%. The time to produce a custom quote is down by 75%."
Rich Shade, Vice President and COO, S&S Hinge

Multiple deployment options: cloud and on-premise

Sage X3 deployment options and services are designed to meet your unique requirements allowing your business to choose the deployment style that meets the needs of your organization today and in the future. With a choice of deployment options you can migrate to the cloud on your own terms, and change your deployment model as your business expands.

A trusted solution with a global footprint

Used in over 80 countries around the globe by more than 5000 customers Sage X3 customers are supported by over 480 business partners and more than 1300 certified consultants. Sage X3 delivers comprehensive business management capabilities from supply chain management to manufacturing through to human resource and payroll management capabilities. This is further complemented by over 50 add-on solutions providing additional industry-specific functionality. Along with comprehensive multinational business management Sage X3 offers support for 18 different industry verticals

ranging from food & beverage manufacturing through to industrial machinery manufacturing and FMCG distribution. This ability to support multiple adjacent verticals allows Sage X3 to support the entire value chain from seed to sale or farm to fork.
