

## Gain Cyber Confidence with a Multi-layered 24/7 Security Solution

Protect your organization from any threat with an AI-powered cybersecurity platform, managed by Net at Work, for a powerful and integrated approach to cybersecurity that extends beyond traditional siloed solutions.

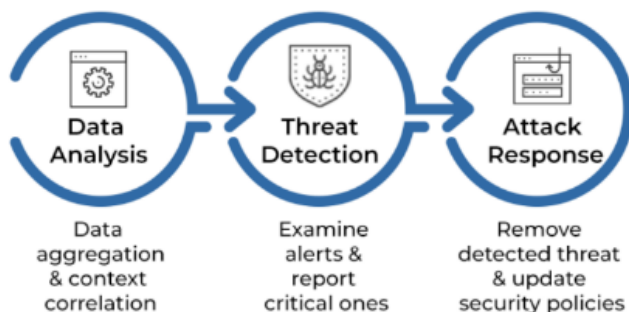

Cyber threats are unending, and you don't have time for it. Or you don't have the budget. Or you don't know what you need. There is no shortage of challenges, but the Net at Work Security Team is here to help.

### Robust Cybersecurity with Net at Work

Net at Work's comprehensive cybersecurity solution offers round-the-clock monitoring, threat detection, and incident response capabilities, ensuring the utmost protection for your digital assets and data.

#### HOW DOES XDR WORK?

#### Key Highlights

- 24x7 Proactive Monitoring
- Robust Managed Policies
- 3 Protected Workstations/Person
- Productivity Suite Protection
- Enhanced SentinelOne Complete
- SIEM Centralized Monitoring
- 24x7 SOC-backed SIEM with Auto-remediation

### SentinelOne XDR

Unifies and extends detection and response capabilities across multiple security layers, including endpoint, cloud, identity, network, and mobile, providing security teams with centralized end-to-end enterprise visibility, powerful analytics, and automated response across a large cross-section of the technology stack.

### 24/7/365 Security Operations Center (SOC)-backed SIEM

With our SOC-backed security, information, and event management (SIEM) solution, powered by Barracuda®, individual events are auto-correlated into an attack sequence, to streamline investigation and response. Our analysts can automatically resolve threats by executing orchestrated remediation actions in a single step, including network quarantine, auto-deploy agents on unprotected workstations, or automate policy enforcement across cloud environments. Per identified threat, in conjunction with Barracuda, Net at Work's SOC analysts immediately respond to ensure that the situation is isolated and stopped with remedies like Account Disable, IP Block, Password Reset, Host Quarantine, Instance Re-deploy, and Message Block.

## Multi-Layered Managed Security

Protect your network, servers, endpoints, and email solution through a 24/7/365 SOC and an enhanced SentinelOne XDR platform, fully managed by Net at Work.

### Managed Security Packages

Security Features	Managed EDR	Managed XDR	Managed XDR Premium
Endpoint Protection backed by SentinelOne Control	●	●	●
SIEM centralized log collection	●	●	●
24x7 SOC monitoring	●	●	●
Scheduled and on-demand reporting	●	●	●
Robust default policies and SOPs	●	●	●
Customizable policies and SOPs	●	●	●
Incident Response*	●	●	●
Up to three workstations protected/user		●	●
EDR Protection for Servers		●	●
Cloud Protection (e.g., Microsoft 365/Google Workspace)**		●	●
Auto-Remediation		●	●
Endpoint Protection backed by SentinelOne Complete			●
Forensic data gathered			●
Proactive threat hunting & automated responses for IOCs			●
Server Protection***			●
Email Security and Cloud Backup			●
Network Device Protection			●
DNS Protection			●
Web Content Filtering			●
Email Security Awareness/End-User Training			●

### 24x7 SOC-backed SIEM with Auto-remediation *(included with Managed XDR and Managed XDR Premium)*

- + Real-time threat monitoring and guidance from a team of security experts
- + Dedicated teams for around-the-clock coverage
- + State-of-the-art security technologies, world-class threat intelligence, streamlined SOC runbooks, and vigilant monitoring
- + The infrastructure includes Security, Orchestration, Automation & Response (SOAR), and machine learning to improve the accuracy and speed

### End-user and Administrator Support

- + Unlimited multi-channel support (email, phone, and chat)
- + Incident report and review

With Net at Work as your IT partner, you can leverage our expertise and cutting-edge solutions to streamline your IT operations, enhance productivity, and fortify your cybersecurity posture. Whether supporting a single IT project, managing IT, or delivering fully managed infrastructure, Net at Work has you covered.
