Optimize Chemical Manufacturing Operations

The Ideal ERP Solution for Chemical Manufacturers and Distributors

Restricted Inventory Management

Control storage and distribution of restricted chemicals, supporting compliance by blocking unauthorized sales and managing documentation requirements.

Safety Data Sheet (SDS) Management

Automate SDS storage, retrieval, and distribution, ensuring compliance with safety standards and regulatory demands.

Advanced Pricing

Enable dynamic pricing adjustments with "what-if" scenarios and approval workflows, helping companies stay competitive and maximize profitability.

A Comprehensive Solution for Chemical Manufacturers and Distributors

Purpose-built to address the unique needs of chemical manufacturers and distributors, this ERP suite combines Net at Work's Chem at Work with Sage X3's robust functionality, creating a unified solution for compliance, production, traceability, and operational efficiency.

Chem at Work simplifies complex workflows by consolidating essential functions including compliance checks, inventory tracking, and pricing management into a single, highly configurable platform. With specialized capabilities like restricted product controls, automated SDS management, and advanced pricing features, it enables chemical companies to operate efficiently, stay compliant, and maximize profitability.

Chemical Production Perfected

- **Compliance Tracking for QA Teams:** QA teams use Chem at Work to manage restricted inventory and ensure all necessary documentation for regulatory compliance is in place before products ship.

- **Proactive SDS Management for Regulatory Teams:** Regulatory teams benefit from automated SDS tracking and distribution, making safety data easily accessible for audits and reducing compliance risk.

- **Dynamic Pricing Adjustments for Sales Teams:** Sales teams utilize the Advanced Pricing module to run "what-if" scenarios, gaining insights for strategic price setting that aligns with market demands.

Chemical Solution Bundles & Add-Ons

Chem at Work **Starter Bundle**
- Sage X3 with Simplified Manufacturing

Chem at Work **Essential Bundle**

- Chem at Work Starter Bundle PLUS
- Formulation
- In Process and Customer-Specific Quality
- Restricted Inventory with Regulatory Reporting Pack
- Enhanced Notes
- SO and PO Freight Absorption
- Bulk Lot Assignment
- Lot Mass Expiration
- Pack Out Automation
- Document Distribution
- SDS and COA Management
- Family Product Master Synchronization

Chem at Work **Advanced Bundle**

- Chem at Work Essentials Bundle PLUS
- Surcharge Management
- eSignatures
- Version Control
- Change Control
- Preventative Maintenance
- Price and Cost Automation
- Advanced Inquiries

Chem at Work **Add-Ons**

- Authorized Supplier/ Manufacturer
- Rebate Management
- IBC Management
- UL Integration
- FDA Validation
- Warehouse Automation
- Weigh Scale Integration
- Shipping Integration
- Sales Tax Automation
- Salesforce Integration
- EDI Integration
- eCommerce and Portals
