Sage for Construction Essentials package

Sage *Net***at***Work*[®]

The affordable software suite for growing construction companies.

Grow your construction business confidently with a cost-conscious package of preconstruction, operations, and finance software built to handle your evolving needs.

Trusted by builders like you for over 50 years, Sage understands the issues that construction companies face today, and how to prepare for the challenges of tomorrow. The Sage for Construction Essentials package unites must-have software solutions from Sage and is designed and priced for growing construction companies. Now, you can streamline construction operations, project management, and financial capabilities without breaking the bank.

“Sage is our platform for growth. It’s providing us with vastly improved accuracy, control, workflows, and collaboration.”

Chris Herak
Director of Finance, VFS Fire and Security

Accelerate your growth with the right solution at the right price

As your company grows, manual processes can hold you back, making daily construction operations and business analysis more challenging. But even if you know you've outgrown your financial solution, the thought of investing in construction management software can feel daunting. That's where the Sage for Construction Essentials package comes in—providing all the capabilities you need to streamline your operations without breaking the bank, so you can keep building with confidence.

Sage for Construction Essentials unites our must-have software solutions for growing construction companies in an affordable package.

Preconstruction

Simplify preconstruction and win more business. Track job opportunities, quickly build estimates, upload drawings and specifications, and easily set up awarded projects.

Operations

Efficiently execute projects with construction management tools that let you deliver projects on-time and on-budget while collaborating effortlessly with project teams.

Finance

Maximize project delivery using the #1 provider of construction finance management software. Access real-time job costing so you can make thoughtful and data-driven decisions that protect project profit.

Your essential foundation for growth

Feel confident knowing you've invested in the right solution that will scale with your business.

Sage Construction Management

Construction management software

Experience end-to-end software that handles every aspect of construction management—from preconstruction to closeout, and everything in between. Win more business by tracking leads and managing the bid process, deliver projects on-time and on-budget, reduce risk, and maximize profits. Built for collaboration and mobility, you can make quick and informed decisions with real-time project information, access the platform anytime and from any device, and keep project teams working in sync—office staff, field teams, subcontractors, vendors, and beyond.

Sage Intacct Core Financials

Accounting software

The powerful Sage cloud accounting software meets all your essential accounting needs and gives you total visibility into the health of your projects and business.

We've got you covered with everything from a dimensional general ledger, accounts payable and receivable, balance sheet, P&L statement, automated revenue recognition that can handle basic or complex requirements, and so much more. With finances in hand, you can spend less time on administrative accounting tasks, and more time building.

Sage Intacct Construction Module

Construction accounting feature set

We understand the complex demands and nuances of construction financial management. Building on the foundation of Core Financials, the Construction Module offers the extra horsepower you need for construction. Stay on top of project finances in real time with visibility into job costs, change orders, invoices, and more. You'll gain a clearer picture of all the details including your labor, subcontractor, material, and WIP costs, and will be set up to easily manage the construction billing process.

Sage Intacct Custom Report Writer

Reporting software

Even small businesses need visibility into financial and operational metrics to make timely, data-driven decisions for budgets, job progress, staffing, subcontractors, and more. The Sage Custom Report Writer delivers on-demand reporting, so you can measure project performance and easily compare metrics against historical data. You can quickly create reports that give your teams immediate visibility into project status. Plus, customizable dashboards allow each employee to find the right information they need to make key decisions for their role.

Sage University Learning

Learning package

Develop confidence and get the most value from your Construction Essentials package. With access to Sage University, you'll have a full library of on-demand educational and training resources at your fingertips. Your learning package also helps you to stay up to speed on the newest products and features, so you can make the most of them. With ongoing access to all of these resources, you can feel confident knowing you're set up for accelerated short and long-term success.

With Sage Construction Management, you can manage all your project operations from one platform and use real-time data to make quick and informed decisions.
